Services Overview

Oil & Gas

Chemical & Petrochemical

Power Generation

Renewable Energy

- 1- Multidisciplinary Engineering Services
- 2- Inspection and Expediting – 2° Party Inspection World Wide
- 3- Project Management, Field and Commissioning Services - PMS
- 4- Wind and Solar Energy Services
- 5- Construction, Operation and Maintenance of Industrial Power Plants
- 6- HR Solutions - Technical Recruiting & Head Hunting (Energy Field)

Framework agreement
solar, wind,
geothermal,
biomass

Engineering,
Site supervision
and PMS

Turbine, generator
and thermal cycle
piping revamping

Revision and certification
of safety devices

Supervision Services –
Project Management
(down-stream,
up-stream)

Extraordinary Service
Erection of wind turbines
model VESTAS,
Electrical and
mechanical completion

Civil & Mechanical
Engineering for geothermal area

Assembly and welding
of steam pipelines,
geothermic plant
and aqueducts

Focus on:

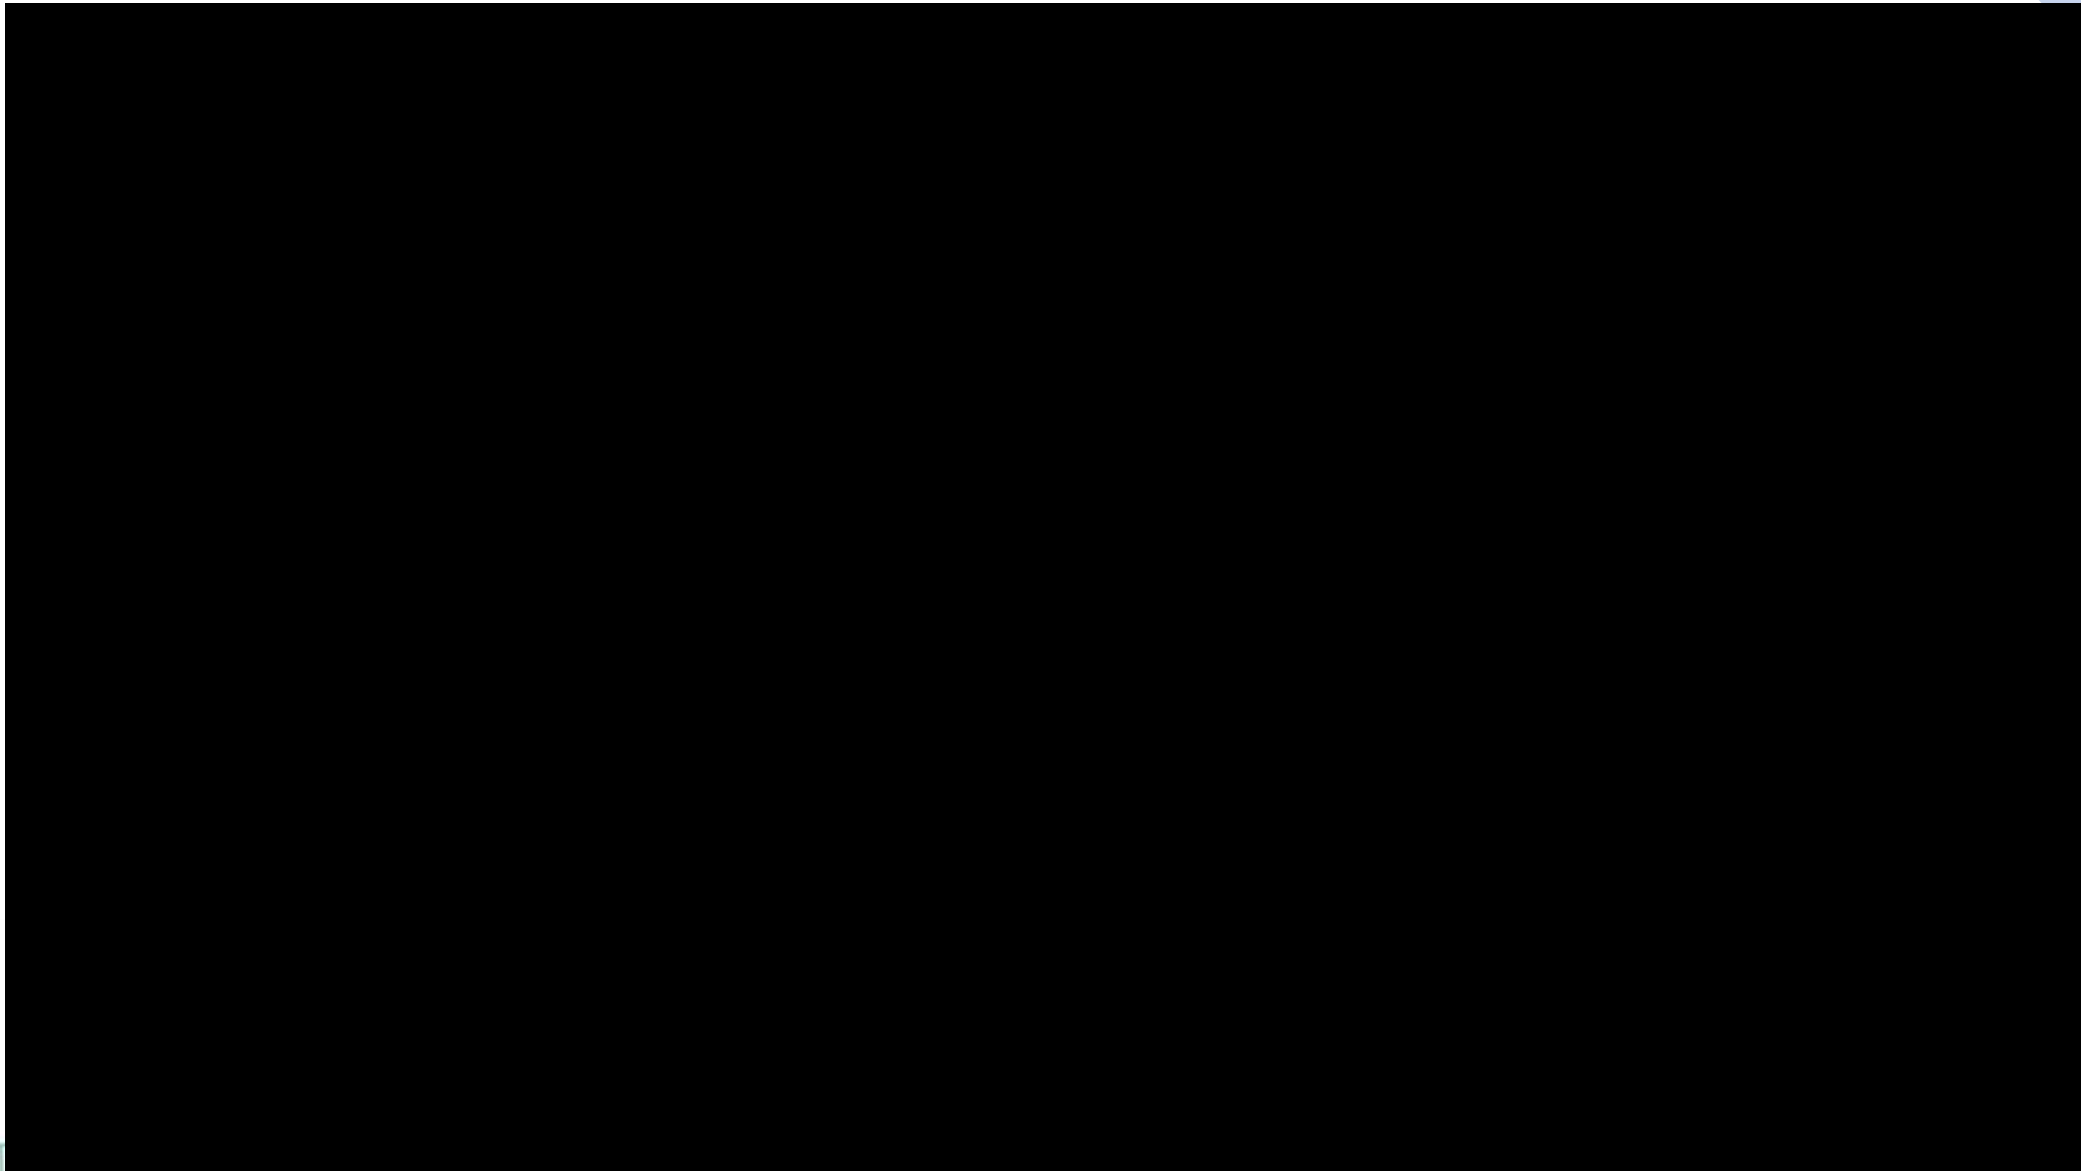

Construction, Operation & Maintenance of Industrial Plants

-  **Technical services on site**
-  **Traditional industrial systems**
-  **Plant operations and logistics**
-  **Steam and water pipelines**
-  **System gathering of power plants**
-  **Modification, upgrading and revamping**
-  **Mechanical and electrical maintenance**
(ordinary and extraordinary)
